Why information literacy

Discussion: join.nearpod.com: The correlation between information literacy skills and resources

Obstacle to the use of electronic resources (1)

- + Physical barriers
- + Personal barriers

Information literacy of students as a correlate of their use of electronic resources

- + Ukachi (2015): undergraduate students do not possess adequate information literacy skills necessary for optimal utilization of the libraries' ERs (2)
- + ACRL (2015): students that had received library instruction reported a higher use of the library as an information resource (3)

Information landscape in the age of AI

- **Artificial intelligence:**

- + Shape our information practices contributing to the trend of personalized content (4): Google map, Spotify, Netflix,...
- + Reduce diversity in content consumption, and narrow our information landscapes

- **Generative AI may generate:**

- + Misleading content
- + Artificial hallucination
- + Shaping or even revolutionising organisations and communication

Source: (5), (6)

Generative AI and its impact on information literacy

- Enhance search algorithms
- Personalized information retrieval
- Filter bubbles
- Understanding Bias in AI algorithms
- Ethical AI use in research and decision-making

Recent feedback

Nothing for now

This module, developed by the RMIT University Library, includes practical examples of how students can use generative artificial intelligence (AI) tools in their learning. This module is designed for students across different disciplines and focuses on generative AI tools that are available to all RMIT students. It includes information on RMIT policies, guidelines and resources relating to generative AI and academic integrity.

This module has been adapted from the University of Sydney [AI in Education module](#)  licensed under a [CC BY-NC 4.0](#)  licence.

Image generated using Adobe Firefly from the prompt group of people using artificial intelligence tools to study.

Generative AI Tools - A Library Instruction

Assign To Edit

This site is created by **RMIT Vietnam Library** team to provide an instruction on using Generative Artificial Intelligence (AI) tools for students, staff and researchers.

Generative AI has recently become a regular tool to assist learning, teaching and doing research, especially in academic environment. Using AI tools effectively can help to boost your performance greatly. Nonetheless, applying the AI generated contents ethically to maintain academic integrity is highly recommended. Follow the instructions and suggestions in this page to ensure a compliance in using Generative AI tools in your research.

To get started, select one of the links below.

Generative AI in Information literacy training program

- Use of Generative AI in searching and use of information
 - + Generate searching terms
 - + Summarise articles/books
 - + Find relevant readings
- Use of Generative AI in designing personalized information literacy program
 - + Support in guiding students on the importance of information evaluation
 - + Support in design situational quiz on information evaluation skills
